Industrial
Solutions**

“ NETKRAFT®

is here to meet various needs

Choose Netkraft® for safe product delivery.

Netkraft® is a product group developed by laminating materials such as film, foil, paper, fabric and reinforcement scrim with extrusion and adhesive lamination techniques.

Netkraft® product group has a structure that can fulfill the needs of many different industries, as it can be produced with diverse materials. These different industries can be listed as;

- **Metal Industries:** Tear-resistant, reinforced laminated products for packaging metal products,
- **Automotive and Spare Parts Industry:** Fabric laminated products produced to protect against scratches,
- **Automotive and Medical Industry:** Reflective rolls with radiant barrier feature,
- **Construction Industry:** Reflective heat insulation, roof and facade covers, waterproof and breathable membranes
- **Non-Food Consumer Goods Industry:** Multilayer and flexible packaging products that extend shelf life with their barrier properties.

Netkraft®

Don't settle for ordinary packaging solutions that compromise the safety of products. Choose Netkraft for top-quality protective packaging that guarantees successful delivery every time.

Product Page

Netkraft® Laminates provide 4 main functions:

Mechanical Properties: It increases the strength of the material by making the products more resistant to tearing and puncture during distribution and storage.

Barrier Properties: It protects the products from deteriorating agents such as light, moisture, gas, oxygen, pathogens and various factors that have a degrading effect, ensures the preservation of product quality, and extends the shelf life.

Sealing Properties: The sealing of the substrate seals the flexible packaging in isolation to contribute to product quality and shelf life.

Breathability Features: The breathing feature of the webs ensures air circulation and allows water vapor and unwanted gasses to be thrown out. Breathability is provided with microporous films or micro-perforation applications.

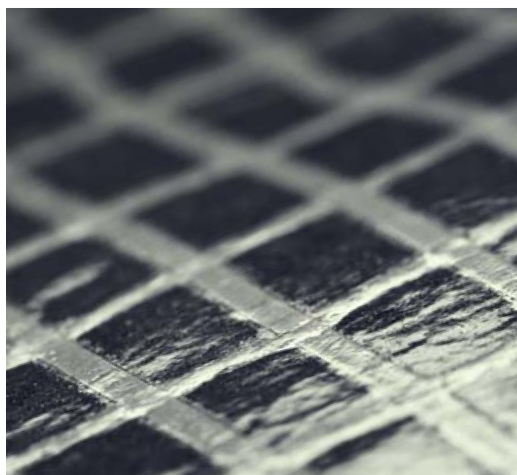

Production Capabilities:

Adhesive Lamination 

Extrusion Lamination 

Micro Perforation 

Slitting and Rewinding
